

Garden Pests and Plant Diseases

Selected Books

Image by Natalie Ngo

Introduction

The following is a list of selected books held at the library that refer to garden pests, injurious insects, plant diseases and their control through a search of the subject headings: *garden pests, plant diseases, insects – injurious and beneficial, pest control, pest control – biological control, and integrated pest management*. This list is focused on home garden pests and their controls, rather than agriculture.

The library has three current periodicals whose focus is pest control: *Cal-IPC news* (California Invasive Plant Council); *Common sense pest control quarterly* and *The IPM practitioner* (both published by the Bio-Integral Resource Center). Many other periodicals regularly have articles on pests and plant diseases and are worth consulting.
